How to Order	48

Our beautiful hand finished fittings are unique. All made in England using original patterns and the finest materials, our products are generally acknowledged to be the best in the world. Authentic, solid and decorative, they are the perfect complement to antique restoration and period furniture manufacture.

Our products include: clock ornaments, door furniture, drawer pulls, escutcheons, handles, hinges, knobs, locks, military chest fittings, table fittings and many other items. Full details of our service are on our website www.hesavill.co.uk If you would like to discuss your requirements further, we shall be delighted to advise you on the best options for your project.

With an extensive stock of over 1,000 different patterns and sizes we can usually despatch your order by return. Our Bespoke Service inevitably takes a little longer but again delivery is rapid and we do our best to help you achieve that unique look or special finish as quickly as possible.

H. E. Savill Period Cabinet Fittings is a well established family business which has provided a highly acclaimed service to the period furniture industry in many parts of the world for over a hundred years. Our enterprise owes its origin to a passion for English antique furniture, its beautiful proportions and skilled craftsmanship. This is our heritage. We delight in sharing it with others and we are keen to enable discerning collectors, restorers and designers to enjoy the fine fittings that such furniture deserves.

We present our new Catalogue to you with our compliments and look forward to hearing from you whenever you require our service.

Cabinet Handles

The quintessential antique brass cabinet handle. Timeless, elegant and well proportioned, this classic design suits furniture of any period from the 18th century onwards.

Sizes are centre-to-centre of bolts.

Oval Plate Handles

Another classic style much used in the 17th and 18th centuries. These detailed neo-classical patterns provide the "Hepplewhite look".

A perfect replacement handle. The size and shape of plate covers old drill holes and plate markings very effectively.

The tools and patterns used today are the originals employed by the early producers of brass handles in Birmingham, the traditional heart of British manufacturing.

Authentic designs that age beautifully and will appreciate in value as they do so.

Sizes are overall width across plate.

R.1640
3" (76mm) 3.3/4" (95mm)

A range of plain, fretted and engraved plate handles dating from the 17th and 18th centuries.

Classic Georgian designs including: Chinese Chippendale, Sheraton and neo-classical patterns from Robert Adam and William Kent.

Some matching escutcheons shown on pages 17-20.

*Attached with separate grips, pommels, threads and nuts
(in the traditional way)*

Sizes are width across plate.

Pierced Plate Handles

Brass handles fretted to create the oriental Chinese Chippendale style which was fashionable in the 18th century.

Much used in antique furniture restoration and furniture manufacture today. These exquisite fittings are striking in any finish and against any colour of wood.

Drop Handles

Some of these designs date from the Restoration period beginning in the 1600s. Others are from the early 18th century William and Mary period.

The Dutch drop is widely used on reproduction antique desks, bureaux and secretaires.

Many of these designs also work well in modern settings.

Pedestal and Wardrobe Handles

Most of these vertical fitted handles match the cabinet and plate handles.

Pedestal handles are surface mounted with brass pins.

Wardrobe handles have a square spindle on the back to operate the lock.

Expertly made and tested for strength for all modern requirements.

Most of these styles date from the 18th century. The squat type (C.1342 and C.938) were popular in the Regency period.

Brass wheels were used until the Victorians introduced white porcelain wheels.

The Edwardians favoured the brown wheels which are much used today.

For use on heavy upholstered furniture and large ornate dining tables.

The Napoleonic wars created a style known as Military or Campaign furniture.

Designed to make maximum use of storage in the hold of a ship, it is block-like in shape and in separate moveable sections. The handles were mostly flush fitting and the corners protected with brass covers.

Still used today in boat building, these items have other modern applications such as to furnish picnic boxes for sporting and social events (e.g. racing, shooting parties etc.)

Furniture Brasses

A Short History of English Furniture Fittings

This well illustrated guide depicts the different types of brass fittings used in English furniture design through the ages. It also describes the historical events and changing lifestyles that have produced the classic styles and patterns that have endured to this day.

Spanning nearly four hundred years, from the early 1600s to the 1950s, this fascinating story covers the following periods: Jacobean, Restoration, William & Mary, Queen Anne, Sheraton, Chippendale, Rococo, Adam, Neo-classical, Georgian, Regency, Victorian, Edwardian, Arts & Crafts, Art Nouveau, Art Deco and finally Utility 'war' furniture (no brass on the latter).

A useful reference for restorers and antique reproduction manufacturers as well as architects, interior designers and even new furniture designers. Written in a simple non technical style, this informative book can also be enjoyed by the general reader.

48-page illustrated full colour hardback book ~~£12.50~~ now £6.50

Monarch	Period	Style	Designers
Elizabeth I (1558-1603)	Elizabethan	Early English	Andrea Palladio (1508-1580)
James I (1603-1625)	Jacobean	Oak	Inigo Jones (1573-1652)
Charles I (1625-1649)	Carolean	Baroque	Christopher Wren (1653-1783)
Commonwealth (1649-1660)	Cromwellian	Baroque	Thomas Tompion (1639-1713)
Charles II (1660-1685)	Restoration	Baroque	Andre Charles Boulle (1642-1732)
James II (1685-1689)	Restoration	Baroque	Grinling Gibbons (1648- 1741)
William & Mary (1689-1694)	William & Mary	Rococo	Gerrit Jensen (1680-1715)
William III (1694-1702)	William & Mary	Rococo	William Kent (1685-1748)
Anne (1702-1714)	Queen Anne	Rococo	Gillows (1704-1772)
George I (1714-1727)	Early Georgian	Rococo	Henry Holland (1713-1800)
George II (1727-1760)	Early Georgian	Neo-Classical	Thomas Chippendale (1714-1779)
George III (1760-1800)	Late Georgian	Neo-Classical	George Hepplewhite (1727-1779)
George III (1800-1820)	Regency	Regency	Robert Adam (1728-1792)
George IV (1820-1830)	Regency	Regency	Angelica Kauffman (1741-1807)
William IV (1830-1837)	William IV	Regency	Thomas Sheraton (1751-1806)
Victorian (1837-1901)	Victorian	Eclectic	Thomas Shearer (Ca. 1780)
		Arts & Crafts	George Smith (1800-1830)
Edward VII (1901-1910)	Edwardian	Art Nouveau	William Morris (1834-1876)
			AWN Pugin (1812-1852)
			Charles Rennie Mackintosh (1868-1928)

The Georgian Period (1714 - 1800) is generally acknowledged to be the “Golden Age” of English cabinet making. It witnessed the flowering of a mature English furniture style based on the classical proportions of Ancient Greece and Italy, while successfully incorporating other mainly European influences.

The “Big Three” designers of the 18th century, Chippendale, Hepplewhite and Sheraton, owed much to the influence of the architect and designer, Robert Adam (1760 - 1795), who, having studied ancient architecture in Italy, designed furniture with classical details to complement his classically designed architecture.

Thomas Chippendale (1750 - 1790) published “The Gentleman’s and Cabinetmaker’s Director” in 1754. Chippendale style can be classified into three types: French, Chinese and Gothic.

George Hepplewhite (1765 - 1800) designs were published posthumously in “The Cabinet Maker and Upholsterer’s Guide” in 1788. The Hepplewhite style is neo-classical, characterised by a delicate appearance and use of contrasting veneers and inlay.

Thomas Sheraton (1780 - 1820) published “The Cabinet Maker’s and Upholsterer’s Drawing Book” in 1791. His style is neo-classical, characterised by delicate straight lines, light construction, contrasting veneers and neo-classical motifs and ornamentation.

Why Brass

An alloy consisting of copper and zinc, brass is of outstanding adaptability and usefulness. No metal or alloy lends itself to such a variety of finishing processes or can be made to simulate so many other metals.

Colours

Brasses lend themselves to a variety of chemical and heat colour finishes which are different from the natural colours of the alloy. The normal colour of brass can be varied by alteration of its composition and can be further changed by using lacquers of different colours, by treatment with certain chemicals such as sulphide and by heat treatment which gives different tints according to the temperature. Brass offers a remarkable series of colours, of which the most notable are those with 80% copper since they simulate gold and range from a pure copper colour through yellow to white.

Our Finishes (Illustrated opposite)

Our standard finishes are antique and polished brass. We can also supply many other colours and finishes to achieve exactly the look you seek: polished chrome, polished nickel, old English brass, gold plate, black gold, silver plate or antique silver, black chrome, dull nickel, light antique, dark antique, matt antique, matt brass and sanded brass. The choice is endless....

A practical choice

In addition to its aesthetic appeal, brass has other hidden virtues. The surface is anti-microbial and has an inherent ability to kill a wide range of harmful microbes, often within two hours or less. These properties have been demonstrated by an extensive body of research, which also suggests that if touch surfaces are made of brass, the reduced transmission of disease-causing organisms can reduce patient infections especially in hospital intensive care units. For all touch surfaces, therefore, such as door knobs, finger plates and taps, brass is a safe option and the best choice for use in hospitals, schools, commercial and domestic kitchens, indeed any place where the need for good hygiene and cleanliness are paramount considerations.

Brass working : A Brief History

As skilled craftsmen have migrated from the East bringing ancient skills and craftsmanship, brass working has had a significant economic, political and artistic impact on Western civilisation.

Bizantium, from the time Constantine made it the seat of empire, in the early part of the 4th century, was for 1,000 years renowned for its metalwork. Its position as a trade centre between East and West attracted the artistic skill of craftsmen from Syria, Egypt, Persia, Asia Minor and the north shores of the Black Sea. Some Italian churches still retain the doors cast in Constantinople in the late days of the Eastern empire. The craftsmen, later forced to leave Bizantium, passed to Germany, France and Italy and thence to England, bringing a revival of ancient classical forms, which endure to this day.

From the Middle Ages, the industry in brass has been important for artistic purposes, originally centred in Belgium, France, Holland and Germany. From the 12th century onwards magnificent works were executed for churches and cathedrals and later in the 18th century objects for domestic use were created. As a result, the doors of many major Western churches, fashioned in brass, are of classical design. A prominent feature of such doors is finely modelled lion heads with manes and rings hanging from their jaws. These were to be found in Germany, France and Scandinavia as well as England. The oldest extant is probably the sanctuary knocker in brass on the door of Durham Cathedral. Such brasses handed down through the ages have come to stand for stability. Many brass antique and period reproduction handles replicate these historic lion head patterns and with other classical motifs, link traditional English furniture with ancient cultures and civilisations.

Centres of artistic creativity shift from one place to another owing to wars, conquests and migrations - why bronze was preferred in Italy, iron in Spain and Germany and brass in Belgium and Holland from where it travelled north to England, cannot be satisfactorily explained - it is certain, however, that through turbulent times and changing lifestyles, the aesthetic and practical values of brass have assured its lasting popularity for many varied uses and should continue to do so for centuries to come.

Antique	Up to the 19th century this meant classical, of ancient Greece or Rome. Now more usually furniture made before 1830.
Art Nouveau	Stiff vertical furniture style at the turn of the 19 th century.
Baroque	Whimsical or grotesque style developed in the 17 th century from Renaissance forms.
Brass	An alloy of copper and zinc. The surface of brass has antimicrobial properties.
Cabinet making	Craft of skilled joinery using veneers.
Carpentry	Making of wooden structures by nailing timbers together.
Casting	A manufacturing process by which liquid metal is poured into a mould and allowed to solidify.
Escutcheon	A flat piece of metal for protection or ornamentation around a keyhole.
Finial	Knob ornament finishing off post such as chair upright.
French Polishing	A wood finishing technique that results in a very high gloss surface and a deep colour.
Hood Patera	Decorative element used on clocks with swan neck pediments.
Japanning	European imitation of oriental glossy lacquer finish achieved by gum-lac dissolved in spirits.
Joinery	Work that has joints – dovetails, mortise and tenon.
Lacquer	A liquid made of synthetic substances that dries to form a hard protective coat for wood.
Marquetry	Inlaying of patterns made by various woods, etc. into veneers.
Mortise	Hole cut in timber to make joint with another having shaped piece, or tenon, to fit hole.
Ogee	Shape of support (or moulding): concave below and convex above.
Patera	Classical round or oval disc stuck on or carved.
Patina	Colour and feel that wood takes on as a result of age, wear and polishing.
Pediment	Ornamental structure surmounting cornice of cabinets, bookcases etc.
Rococo	Asymmetrical, florid decoration based on rocks and shells prevalent in Europe 1730 -1780.
Stamping	An impression of a design is taken to make a top die. A thin piece of brass is placed over the bottom die, they are forced together to form the plate. The excess metal is then cut away.
Turning	Working wood by applying cutting tools to it as it rotates on a lathe.
Veneer	Thin sheet of hard timber glued on a solid article to give an elegant finish.

How to Order

How to Order

We hope that you have enjoyed our new Catalogue and that H.E. Savill Period Cabinet Fittings will be your first source of supply for all your restoration needs.

Our showcase displays only a fraction of the vast range of fittings we can supply. If you need a product which you cannot find on our website or in this Catalogue, please ask. We shall do our best to source it for you. Our stock is extensive and our access to other suppliers of top quality original patterns, all made in England, is endless.

Our prices are fair and our service is quick and efficient. We aim to despatch your goods by return.

We also provide a Bespoke Service which usually takes 4 to 6 weeks. We shall be glad to discuss your individual requirements.

Do contact us through our website www.hesavill.co.uk or in whatever way is most convenient.

Payment

To be made in pounds sterling by:

Credit/Debit card

Bank transfer

PayPal (hesavill@hotmail.co.uk)

Cheques made payable to H E Savill

Charities

We contribute 10% of our profits to selected good causes. Here are a some of the charities we support :

Satin Nickel

PVD finish or coating, is short for **Physical Vapour Deposition coating**. It is a high-tech vacuum deposition process where the coating material transfers on a single atom or molecule level, which provides an extremely pure and high-performance coating. Products with this finish come with a 25 year guarantee.
